

# Cinema Chair

CREATION<sup>TM</sup>  
The Art of Control

## Design the home cinema you've always dreamed of

At Creation we think the world's best home cinemas deserve the world's best cinema seating. That's why we designed the Creation Cinema Chair from the ground up to give you the ultimate Big Screen experience. The built in ultra-quiet motor system means that you can position the chair exactly where you need it, adjusting the headrest and footrest at the same time. A choice of over 100 of the finest Italian leathers and Alcantara finishes lets you design the home cinema you've always dreamed of.

The Cinema Chairs can adapt to any desired layout, be it grouped in curved or straight rows, or any other arrangement to suit the room. The Creation Joystick can be installed into the armrest to provide direct control of the chair motor and also manage the Creation On Screen Menu, if this is a feature of your system.

## The world's best Cinema seating

- Luxurious Cinema Seating made with the finest materials
- Multiple seating options available, e.g. combinations of 2,3, 4, 5 seats, etc.
- Low-rise design improves speaker performance and avoids blocking the screen
- Quiet and smooth motor operation

## CREATION™

The Art of Control

### Experience the Big Screen like never before!

Revolutionise your home cinema experience with the Creation Joystick. Occasionally a product comes along that seems so obvious in its simplicity that you wonder why nobody ever thought of it before. The Creation Joystick is one of those products. Built into the armrests of Creation Cinema and TV Chairs, the Joystick is concealed within the chair when not in use, gliding silently to its raised position when needed. The Joystick easily adjusts the chair's built-in motors to your optimum viewing position.

The Creation Joystick integrates with your home control system to manage your Cinema room through a simple On Screen Interactive Menu. All you have to do is access your favourite movie and recline to your preferred position. Watching movies has never been so comfortable!

### Combining beautiful styling with intuitive functionality

- Offers a unique interface for Home Integration
- High-quality Aluminium finish with different colour options
- Optional Swarovski finish
- Back-lit buttons for Home Theatre operation
- POE – power over ethernet – 1 Cat5E cable
- Control of seat motors and On Screen Menu

*“The Joystick will revolutionise your viewing experience”*
